INTELLIGENCE INFORMATION HANDLING COMMITTEE
of the
UNITED STATES INTELLIGENCE BOARD

Office of the Chairman

IHC-MM 25/74

30 August 1974

MEMORANDUM FOR: IHC

SUBJECT : Crisis Management Directory

1. Attached is our first draft of the information you have provided which we are using to construct a crisis communication directory.

2. As you will see, we still have work to do to finish filling in the blanks, and I request your continuing assistance to complete this task promptly.

3. In addition, we solicit your suggestions and advice relative to both format and contents of such a directory, based on the illustrative materials compiled in this first draft. After having received your suggestions and the missing data, we will consider looking to an expansion of the coverage and to making it available for operational use.

4. To stimulate your suggestions, one alternative we are considering in formatting this kind of information is to present it at more than one level of security classification and codeword if that appears desirable. Another possibility is to incorporate the information in a plasticized card appropriate to be hung up in a watch office for ready reference, rather than in a printed directory.
